Retrofitting Experts

At Commercial Industrial Supply, we take great pride in our Valve Actuation Group, composed of technically trained specialists who have years of experience in automation technology. Whether customers require electric, pneumatic, or hydraulic actuators, our group is well-versed in automation technologies, enabling them to control valves remotely, enhance process efficiency, and improve system reliability.

One of the standout capabilities of Commercial Industrial Supply's Valve Actuation Group is its proficiency in retrofitting actuators to match specific valve models. This flexibility enables customers to enhance their existing manual valves into automated ones, granting superior process control and minimizing the necessity for manual interventions. Moreover, our team offers expert technical support, guiding customers on the proper installation, operation, and maintenance of valve actuation systems.

Cutting-Edge Tech

Commercial Industrial Supply proudly offers a broad line of quality, corrosion-resistant, and ultra high purity process solutions to serve a wide range of industries, including industrial, manufacturing, water, wastewater treatment, oil, gas, chemical processing, aquatic life support, metal plating & finishing, biotech, pharmaceutical, semiconductor, and more. Commercial Industrial Supply's Valve Actuation Group is a dependable ally, delivering top-notch answers to meet your unique requirements. The team's unwavering dedication to excellence establishes them as a forefront provider of cutting-edge solutions in the industry

Capabilities

The Valve Actuation Group's capability and commitment to dependable solutions result in improved maintenance of valve actuation systems, ensuring seamless operations and optimized performance. With a long history of serving a diverse range of industries, Commercial Industrial Supply's Valve Actuation Group has gained extensive experience in addressing various valve automation challenges. Trust Commercial Industrial Supply's Valve Team to enhance your operations with unmatched expertise and reliability.

Our Valve Actuation Group is a shining example of our dedication to excellence, which has earned us the position of being the nation's top distributor. Our specialists not only excel in automation technologies but also leverage machining and welding capabilities to provide customized solutions. They achieve this through several key approaches:

- Custom Mounting and Fabrication
- Retrofitting Solutions
- Expert Technical Support
- Efficiency and Reliability
- Inventory Management

The Valve Actuation Group exemplifies profound expertise in manual and automated valves for industrial and municipal flow-handling applications. Our Valve Actuation Group offers a wide range of solutions for fluid handling, designed to meet the diverse needs of various industries and process types. We provide a comprehensive selection of valve types in metal and plastic body materials with various seat and trim options. Ball valves, butterfly valves, check valves, and gate valves are just a few types offered as well as others, offering isolation and precise flow control to cater to different applications across several industries.

INDUSTRIES SERVED

Industrial

Manufacturing

Water & Wastewater Treatment

Refinery / Oil & Gas

Chemical Processing

Aquatic Life Support

Metal Plating & Finishing

Pharmaceutical

Semiconductor

Biotech

Commercial Industrial Supply's Valve Actuation Department offers a comprehensive range of in-house services to meet your valve actuation needs. Our specialized Valve Actuation Group not only excels in automation technologies but also leverages machining and welding capabilities to provide customized solutions.
