

SnapPort® Drainage Fitting

SnapPort® drain applied to a drum

SnapPort® drain applied to enclosed sheet metal ductwork or drip pan

THE SNAPPOR® DRAINAGE FITTING FEATURES A REVOLUTIONARY DESIGN FOR EASY INSTALLATION, AVAILABLE EXCLUSIVELY FROM LASCO.

FEATURES / BENEFITS:

- A revolutionary, patented drainage fitting available only from LASCO.
- Allows for gravity drainage of water-based liquids from a vessel or surface.
- Unlike traditional and competing bulkhead fittings, SnapPort® does not require access to the interior of a vessel or surface for installation. Often times, that access is either difficult or impossible.
- Easily installs in less than a minute!

APPLICATIONS:

- For draining common container types – rain barrels, buckets, drums, holding tanks, troughs, sheet metal pans, etc., made of any rigid material, from approximately 1/16" to 3/8" thick.

REQUIREMENTS/TOOLS:

- Requires a 1 1/8" drilled hole; the SnapPort® outlet accepts 1" PVC pipe (for solvent welded piping extensions, if required) and a shutoff valve, if desired.
- Includes installation/tightening tool.

MATERIAL:

- Made from PVC and Acetal
- Not recommended for use with chlorinated water.
